## I think I will not use conditionally automated cars when available.

- 39.0% of road users surveyed state that they will not use conditionally automated cars when they are available
- 33.2% of the respondents think they will use a conditionally automated car when available
- This opinion varies remarkably between the respondents' country of residence and also between males and females
- Read more in the report on the international BRAVE population survey: [BRAVE Deliverable 2.3](#)
